Abstract

Introduction

- Can we see climate warming for ourselves by analyzing this data?
- In what parts of the country are temperatures getting warmer? Are there any parts that actually got colder over 1950-2010?
- Can we say, based on these data, what change has occurred in precipitation over the period?

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
